

Sumit Chauhan

Software Engineer — SDE Intern

Delhi, India | +91 7678331501 | sumitchauhan10062004@gmail.com
sumitchauhan.me | github.com/halloffame12 | linkedin.com/in/sumit-chauhan-a4ba98325

Summary

Computer Science & Data Science student at IIT Patna with hands-on experience across the full software development lifecycle — frontend, backend, mobile, and applied ML. Independently designed, built, and deployed Versz, a production social platform serving live users. Strong fundamentals in data structures, algorithms, and system design, with practical exposure to REST APIs, databases, and real-time systems. Seeking a Software Engineering Intern role to contribute to and learn from a high-caliber engineering team.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, Dart, Kotlin (basics), SQL

Web & Mobile: React.js, Next.js, Node.js, Express.js, Flutter, Tailwind CSS

Backend & APIs: RESTful APIs, GraphQL, Flask, FastAPI, JWT Authentication, Firebase

Databases: MySQL, PostgreSQL, MongoDB, Redis — Schema Design, Query Optimization

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks

Other: Socket.IO, WebRTC, Git, GitHub, Linux, Docker (basics), TensorFlow (basics)

Experience & Projects

Versz — Founder & Lead Developer

2025 – Present

Personal Project

versz.app

- Independently designed and built Versz, a social debate platform, end to end — React web frontend, Flutter mobile app (Android/iOS), and a Firebase-backed backend — from architecture through production deployment.
- Implemented core product features: social feed, structured debate creation, community groups, leaderboards, and a user reputation/ranking engine.
- Designed REST APIs, authentication flows, and data models supporting concurrent live users; owned the full deployment pipeline and production uptime at versz.app.

AnonChat — Real-Time Anonymous Chat Platform

2025

Personal Project

Node.js, Socket.IO, WebRTC, React

- Built a full-stack real-time chat application with instant anonymous user matching using Socket.IO and WebRTC, including JWT-based session handling and themed chat rooms.
- Optimized socket event handling and added lazy loading to reduce latency; deployed to production with reliable uptime.

Snake AI — Reinforcement Learning Agent

2025

Personal Project

Python, DQN, TensorFlow

- Built an autonomous AI agent using Q-Learning and Deep Q-Network (DQN) to play the Snake game, implementing experience replay and epsilon-greedy exploration to stabilize training.

ForgeStack OS — Full-Stack Project Scaffold

2025

Personal Project

TypeScript, Node.js, React, Flask

- Engineered a modular full-stack scaffold (frontend, backend, and ML-inference templates) to standardize project setup and speed up team onboarding.

Other Activities

- NASA App Challenge (2025):** Contributed to an AI-based exoplanet detection solution for NASA's global student competition; team placed 4th at the DTC Competition.
- Code Slayer 2k25:** Participated in a competitive programming event hosted at NIT Delhi.
- GitHub:** Earned Pull Shark and Pair Extraordinaire badges for open-source contributions.

Education

Indian Institute of Technology (IIT) Patna

Patna, Bihar, India

B.S. in Computer Science & Data Science

Jan 2026 – 2030 (Expected)

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Linear Algebra, Probability & Statistics
